—

When the clinical team at Nuneaton-based Mary Ann Evans Hospice wanted to modernise the building's interior décor, top of their list was durable flooring that could not only meet infection control regulations but would also be low maintenance.

Abstract Flooring was enlisted by the hospice and recommended LVT from Amtico's Spacia 36+ collection to meet these requirements. While Mary Ann Evans Hospice previously had thin carpet tiles, the team felt the new safety LVT should add a contemporary yet welcoming feel to the reception area and various therapy, activity and consulting rooms. The team worked closely with Abstract Flooring to select an array of modern Woods and Stones from the Spacia 36+ to complement the hospice's new interior design.

Style and safety

Amtico Spacia 36+ LVT was specified by Abstract Flooring for its integral antimicrobial protection. All planks and tiles in the collection incorporate an active ingredient resistant to the growth of bacteria, such as MRSA or E.coli, adding peace of mind for patients and staff between cleaning routines, while meeting UK infection control regulations. As Mary Ann Evans Hospice provides day services for patients with mobility issues, safety was paramount. Spacia 36+ offers enhanced slip resistance for the lifetime of the product due to the particles distributed throughout the wear layers.

Modern character

To transform the interior from clinical to feeling more like a 'home from home', the clinical team selected a variety of contemporary Woods, including the chalky White Ash, warm Noble Oak and the striking grains of Worn Ash, for the main communal areas. The traditional rustic tones of Weathered Oak were chosen for the entrance and walkway, while the reception desk was zoned in Small Parquet to aid with wayfinding.

Worn Ash

amtico spacia 36+

Designed for any commercial space where safety is paramount.

This safety flooring collection combines 13 Woods and 3 Stones manufactured with a 0.55mm wear layer, enhanced slip resistance and antimicrobial technology, which protects against bacteria including MRSA and E.coli. Spacia 36+ products carry a 10-year warranty.

Laying Pattern

Small Parquet

This timeless design was utilised in the main entrance to assist patients looking for the reception area and, paired with the Weathered Oak, it provides a contemporary yet homely feel. Parquet is available in large and small versions, in order to create a variety of different looks.

Laying Pattern

Stripwood

The Stripwood pattern was laid in multiple areas throughout Mary Ann Evans Hospice using Spacia 36+ Woods, in order to clearly define spaces without the need for borders and motifs. The communal area was established by laying Stripwood at 45 degrees to visually zone it from the dining room.

Bold statements.
Big ideas.
What our clients say.

“We are extremely pleased with the finished result, we knew it would look great but it exceeded our expectations! The project went really well, the clients were incredibly helpful with the logistics in terms of ensuring we had plenty of areas to complete at any one time. We rate Spacia 36+ very highly because it offers an attractive stylish option for safety flooring – as opposed to the mundane and homogenous sheet vinyl safety flooring usually found in commercial environments.”
