London, UK

Healthcare

Amtico Form

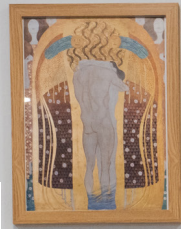

**This stunning Grade II listed Georgian property in Grosvenor Gardens in London, is home to Grosvenor Gardens Healthcare - a private medical clinic offering a comprehensive range of services. When tasked with its fit out, Apollo Interiors chose a neutral colour scheme to complement the period features of the property and entrusted Olivers Contracts to install Amtico Form.**

Amtico Form, with its authentic finish, was an ideal solution to achieve a realistic wood-finish which stays true to the aesthetics of Georgian interiors. The overall effect is a light and welcoming space, which feels homely and safe. An essential element in making clients comfortable in their healthcare environment.

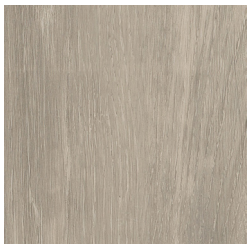

Gotland Oak has been laid in Stripwood throughout, covering over 600m<sup>2</sup>. Its Scandinavian simplicity provides a naturally beautiful interior, with a clean finish, which is ideal for the sector and client perspective.

Alongside creating this fresh aesthetic, LVT offers a flooring solution which is easy to clean and maintain, whilst having the added benefit of antimicrobial protection.

## Featured Pattern:

### Stripwood

The use of Stripwood laying pattern creates a beautiful, authentic space reminiscent of traditional wood flooring in period properties. Its beauty is in its simplicity, creating a timeless and elegant floor. The use of Gotland Oak in Stripwood completes the project in a minimalist way and complements the neutral palette.
