Wallace Whittle

Scotland

Office

Amtico Spacia Acoustic

**Wallace Whittle, an independent consultancy which provides environmental building services, chose Amtico Spacia Acoustic for not just one, but two of their offices.**

With a lively design featuring bold colours for the walls and splashes of colour across furniture and accessories, both the Glasgow and new Edinburgh office features Plaza Concrete from the Amtico Spacia collection in their breakout spaces and meeting rooms. Plaza Concrete's soft greys complement the colour scheme and provides balance for the overall palette.

There is a growing trend in the office sector to provide spaces that promote employee wellbeing and boost productivity. Amtico Spacia Acoustic reduces sound transmission by up to 19dB and increased comfort underfoot by using a high-performance backing layer.

Wallace Whittle's careful placement of Amtico Acoustic in meeting spaces and connecting breakout areas helps to reduce noise distraction in a busy working environment, without having to compromise on design. Furthermore, the easy maintenance of LVT means that kitchenettes are easy to keep clean.

## Featured Products:

**Plaza Concrete**  
SS5S3070

## Featured Pattern:

### Uniform Tile

A classic and timeless pattern which floods the space for an uninterrupted finish, Uniform Tile is a minimalist design and provides the ideal canvas for Wallace Whittles bold use of colour and contemporary design.
