Amtico's Lithuanian business partner Interjero Linija proudly presents this stunning interior renovation of a plenary room that combines soft design with a bold touch.

To complement the room's calm, neutral aesthetic, Rialto Concrete from the Amtico Spacia collection was chosen to flood the centre of the room. The use of large tiles of 914 x 914 mm enhances the room's elegant and composed atmosphere. The border of the room showcases Amalfi, an exciting Terrazzo design from Amtico Spacia, creating a beautiful perimeter that perfectly balances with the overall design palette.

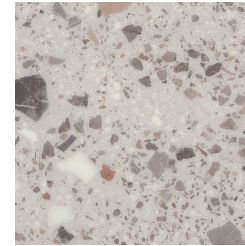

A striking design detail is the integration of a curved Pure Plain Black stripping, used to separate the two Spacia designs. This subtle line defines the layout while maintaining a minimalist style. Framing the design with Terrazzo adds visual interest and gently anchors the space. This layout was developed with a custom CAD drawing, meaning accurate calculation of the material needed was possible, as well as the incorporation of the curved cuts. It is a standout feature from a technical and aesthetic perspective, showcasing the flexibility and creativity achievable with Amtico products.

Featured Products:

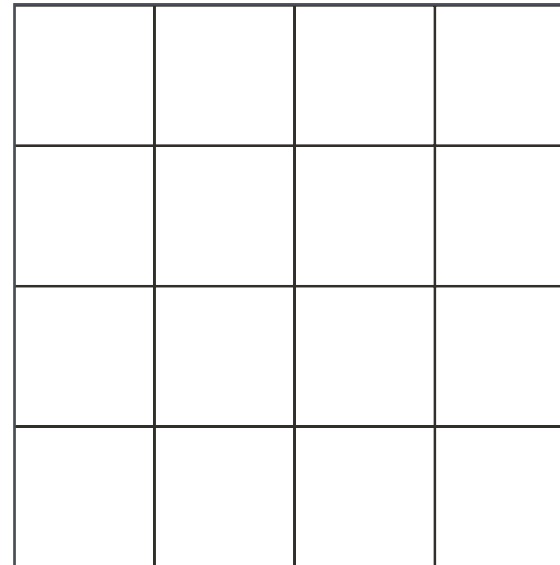

Rialto Concrete
SS5S2611

Amalfi
SS5S2609

**Pure Plain Black
stripping**
AROAPN22

Featured Pattern:

Uniform Tile

Uniform Tile is a simple laying pattern that perfectly suits the use of large tiles. It is the ideal solution to flood large commercial spaces and gives the room a luxurious and understated look. The use of the black stripping subtly introduces the border whilst allowing the bold design of the Terrazzo stand out.
