## NAIVE Restaurant

Bucharest, Romania

Hospitality & Leisure

Amtico Signature,  
Amtico Form

Amtico Business Partner  
Carpet & More

**NAIVE Restaurant is an impressive rooftop venue offering a great view over Bucharest. This project is a top destination for anyone looking for a bar, restaurant, or club, as it brings all three together in one place.**

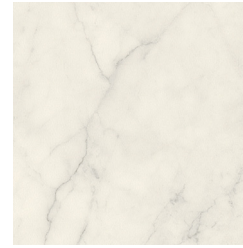

The concept is about having no second thoughts and embracing every moment to the fullest. For the flooring design, Amtico's Romanian Business Partner, Carpet & More, selected LVT from the Amtico Signature and Form collections to create a stylish concept featuring different shapes and laying patterns.

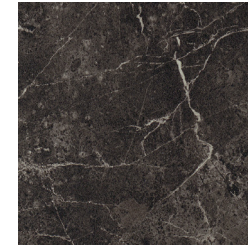

In the main seating area, a timeless three-colour Large Parquet highlights the beauty of marble with Onyx Marble, Tortora Classic Marble and Nero Classic Marble. Another part of the venue combines black and white marble in the curved shapes of Lune Large, surrounded by a golden strip and carpet. The marble-inspired surfaces elevate the space with a luxurious feel, enhanced by illuminated floor strips and refined golden accents. These beautiful combinations are available due to the Endless Possibilities of the Amtico Signature collection.

## Featured Pattern:

**Lune Large EP507**  
The curved shapes of Lune Large work perfectly with marble aesthetics. In this project, the Endless Possibilities option from Amtico Signature has been used, allowing every pattern to be combined with any Signature colour. The combination of black and white marble creates a striking contrast in a large tile format.

### **Basket Weave FP222**

Basket Weave is a beautiful example of Amtico's precision cutting capabilities, creating a decorative woven effect that makes it a true design classic. Paired with Thorndon Oak – a time-worn wood featuring authentic grain and distinctive knots – it forms the perfect setting for a modern bar area.

Here, the Basket Weave pattern is framed by a border of Polished Gold stripping and Nero Classic Marble tiles from the Amtico Signature collection, precision-cut based on a CAD drawing.
